

MARYEM GUALI

Casablanca, Morocco

Ms. Maryem Guali is a middle school science teacher who is currently earning her doctorate degree in Renewable Energy at the University Hassan II Casablanca. She has been working in the education sector for six years and has been involved in civic engagement activities for more than eight years.

In addition to her role as a teacher, Maryem works with JCI Rabat and Jeunes Solidaires, where she manages education programs and trainings for youth that provide them with business acumen and improve their ability to compete for jobs in the future.

Professional Goals

Maryem aims to develop business training programs for middle school youth and establish a business that promotes and teaches soft skills and leadership to students and teacher. She believes that business education leads to the acquisition of skills, attitudes and knowledge that are necessary for future employment. She hopes to create a program that will provide students from all socioeconomic backgrounds with these skills.

Additionally, Maryem is currently working to develop new solar technology that she will use to start her own business.

Professional Fellows Program Objectives

Through the PFP, Maryem hopes to acquire the necessary skills and techniques to promote business education, which she then hopes to be able to teach to her students to encourage them to pursue their goals.
