Ms. Dina Teilab is a Data and Research Manager for GoodsMart where she manages the data analysis, data science and consumer research teams. Previously, she worked as a Consultant on Talents Arena's Data Team, was a Senior Specialist for Customer Insights and Analysis at Etisalat Egypt, and was a Business Developer at Qabila Productions. She has participated in numerous programs including Unilever's Quest Competition, P&G's Finance Competition, and Growth Tribe Academy's 12-week Growth Hacking Immersive Program.

**Professional Goals**

In the future, Dina would like to build a data learning institution that offers students opportunities to develop job readiness skills in data research and management. She hopes that by fostering an environment where students can build and expand their knowledge in this field, data utilization and talent retention in Egypt will improve.

**Professional Fellows Program Objectives**

Through the Professional Fellows Program, Dina hopes to build connections and gain experience in fundraising, diverse project management, and entrepreneurship that will help her efforts in building a learning community that will enrich the data industry of her home country. She is also excited to work alongside people with a variety of cultures and backgrounds.
